SUBJECT INDEX

- Advanced practice nurses, in radiation oncology, 203-211
- during brachytherapy, 208
 - in consultation, 207
 - during external beam radiation therapy, 208
 - during follow-up visits, 208-209
 - in managing after hours care, 209
 - in simulation, 207-208
- Bexxar, in radioimmunotherapy for non-Hodgkin's lymphoma, 262-264
- Brachytherapy, 217
- for early stage breast cancer
 - interstitial brachytherapy, 236-237
 - intracavitary brachytherapy, 237-238
 - role of advanced practice nurses during, 208
- Breast cancer, early stage, radiation therapy options for, 233-241
- considerations for nursing care, 240
 - partial breast irradiation, 235-236
 - interstitial brachytherapy, 236-237
 - intracavitary brachytherapy, 237-238
 - intraoperative radiotherapy, 238
 - other techniques, 240
 - 3-D conformal radiotherapy, 239-240
 - surgery and, 234
 - whole-breast radiotherapy, 235
- Cancer survivorship, and QOL, effects of radioprotectants on, 249-255
- head and neck cancers, 251-253
 - history of, 250
 - lung cancer, 253-254
 - mechanism of action, 250-251
 - pelvic cancers, 254
 - utilization in clinical practice, 251
- CD20 antigens, in radioimmunotherapy for non-Hodgkin's lymphoma, 258
- Combined modality therapy, nurse's role in, 199-200
- safety issues and practice implications, 201
- Consultations, role of advanced practice nurses in, 207
- CyberKnife radiosurgery, image-guided, 217
- External beam radiation therapy, role of advanced practice nurses during, 208
- Frameless image-guided stereotactic radiosurgery, 221-232
- historical perspectives
 - CyberKnife, 222-223
 - definition, 221
 - early radiosurgery, 222
 - stereotactic frames, 221-222
 - nurse's role in, 227-230
 - trials and processes
 - clinical data, 223-224
 - procedural components, 224-227
- Head and neck cancer, effects of radioprotectants on QOL and survivorship in, 251-253
- Image-guided CyberKnife radiosurgery, 217
- Image-guided radiotherapy, 216-217
- Image-guided stereotactic radiosurgery, frameless, 221-232
- historical perspectives
 - CyberKnife, 222-223
 - definition, 221
 - early radiosurgery, 222
 - stereotactic frames, 221-222
 - nurse's role in, 227-230
 - trials and processes
 - clinical data, 223-224
 - procedural components, 224-227
- Infusional toxicities, during radioimmunotherapy for non-Hodgkin's lymphoma, 261
- Intensity modulated radiation therapy, 216, 242-248
- advantages of, 242-243
 - clinical applications of, 246-247
 - implications for nursing practice, 247
 - planning and delivery, 243-246
 - inverse treatment planning, 244
 - patient set-up and treatment delivery, 244-246
 - simulation, 244
- Interstitial brachytherapy, for early stage breast cancer, 236-237
- Intracavitary brachytherapy, for early stage breast cancer, 237-238
- Intraoperative radiation therapy, 217
- for early stage breast cancer, 238
- Inverse treatment planning, in Intensity modulated radiation therapy, 244
- Irradiation, partial breast, for early stage breast cancer, 235-236
- interstitial brachytherapy, 236-237
 - intracavitary brachytherapy, 237-238
 - intraoperative radiotherapy, 238
 - other techniques, 240

- 3-D conformal radiotherapy, 239-240
- Lung cancer, effects of radioprotectants on QOL and survivorship in, 253-254
- Lymphoma, non-Hodgkin's. *See* Non-Hodgkin's lymphoma
- Monoclonal antibodies, in radioimmunotherapy for non-Hodgkin's lymphoma, 258
- Non-Hodgkin's lymphoma, radioimmunotherapy for, 257-265
 - Bexxar regimen, 262-264
 - CD20 antigens, 258
 - monoclonal antibodies, 258
 - post therapy follow-up, 261-262
 - pretherapy evaluation, 259-261
 - rituximab, 258-259
 - toxicity during infusion, 261
 - Zevalin regimen, 264
- Nurse's role, in radiation oncology, 198-202
 - advanced practice nurses, 203-211
 - during brachytherapy, 208
 - in consultation, 207
 - during external beam radiation therapy, 208
 - during follow-up visits, 208-209
 - in managing after hours care, 209
 - in simulation, 207-208
 - in combined modality therapy, 199-200
 - safety issues and practice implications, 201
 - evolution of, 198-199
 - in frameless image-guided stereotactic radiosurgery, 227-230
- Oncology, radiation. *See* Radiation oncology
- Partial breast irradiation, for early stage breast cancer, 235-236
 - interstitial brachytherapy, 236-237
 - intracavitary brachytherapy, 237-238
 - intraoperative radiotherapy, 238
 - other techniques, 240
 - 3-D conformal radiotherapy, 239-240
- Pelvic cancer, effects of radioprotectants on QOL and survivorship in, 254
- Quality of life (QOL), and cancer survivorship, effects of
 - radioprotectants on, 249-255
 - head and neck cancers, 251-253
 - history of, 250
 - lung cancer, 253-254
 - mechanism of action, 250-251
 - pelvic cancers, 254
 - utilization in clinical practice, 251
- Radiation oncology, 197
 - advanced practice nurses, 203-211
 - during brachytherapy, 208
 - in consultation, 207
 - during external beam radiation therapy, 208
 - during follow-up visits, 208-209
 - in managing after hours care, 209
 - in simulation, 207-208
 - nurse's role, 198-202
 - in combined modality therapy, 199-201
 - evolution of, 198-199
- Radiation therapy
 - acute effects of, 218
 - cellular response to, 213-214
 - external beam, role of advanced practice nurses during, 208
 - long-term survivorship issues, 218-219
 - options for early stage breast cancer, 233-241
 - considerations for nursing care, 240
 - partial breast irradiation, 235-240
 - surgery and, 234
 - whole-breast radiotherapy, 235
 - treatment modalities, 214-216
 - brachytherapy, 217
 - image-guided CyberKnife radiosurgery, 217
 - image-guided radiotherapy, 216-217
 - intensity modulated radiation therapy, 216, 242-248
 - intraoperative radiation therapy, 217
 - stereotactic radiosurgery, 217
- Radioimmunotherapy, for non-Hodgkin's lymphoma, 257-265
 - Bexxar regimen, 262-264
 - CD20 antigens, 258
 - monoclonal antibodies, 258
 - post therapy follow-up, 261-262
 - pretherapy evaluation, 259-261
 - rituximab, 258-259
 - toxicity during infusion, 261
 - Zevalin regimen, 264
- Radioprotectants, effects on QOL and survivorship, 249-255
 - head and neck cancers, 251-253
 - history of, 250
 - lung cancer, 253-254
 - mechanism of action, 250-251
 - pelvic cancers, 254
 - utilization in clinical practice, 251
- Radiosurgery
 - image-guided CyberKnife, 217
 - stereotactic, 217
 - frameless image-guided, 221-232
- Rituximab, in radioimmunotherapy for non-Hodgkin's lymphoma, 258-259
- Simulation
 - in intensity modulated radiation therapy, 244
 - role of advanced practice nurses in, 207-208
- Stereotactic radiosurgery, 217
 - frameless image-guided, 221-232
 - historical perspectives, 221-223
 - nurse's role in, 227-230
 - trials and processes, 223-227
- Surgery, for early stage breast cancer, 234
- Survivorship. *See* Cancer survivorship
- 3-D conformal radiotherapy, for early stage breast cancer, 239-240
- Toxicity, infusional, during radioimmunotherapy for non-Hodgkin's lymphoma, 261
- Whole-breast radiotherapy, for early stage breast cancer, 235
- Zevalin, in radioimmunotherapy for non-Hodgkin's lymphoma, 264
